Activated seats were 3666 on 16 October 2026 and 3139 on 13 November 2026

- Licensed seats: 4050 on both dates
- Activated share: 90.5% on 16 October 2026, 77.5% on 13 November 2026
- These are two readings; they do not say why the figure moved

Your team can tell us whether the change was planned

- Was anything changed on purpose between those two dates?
- If yes, a short note is all we need
- If not, we look at it together

If it was not planned, we go through it together in a short session

• Guide to have to hand: Activation checklist: invitations, the payroll sync and crew scope (about 15 minutes)
